

END OF FUNDING PERIOD REPORT

LAUC Statewide Grants, Research & Professional Development Committee

Primary Applicant(s): Danielle Kane

Campus: Irvine

Email: kaned@uci.edu

Telephone: 949-824-2024

TITLE OF PROJECT: " Make it, map it, take it: Create your own digital learning object in a day"

Time Period of Grant: March 2017

Amount of Award Received: \$410

Original Abstract as Submitted: Making a digital learning object (DLO) can be daunting. Let us help you make your own quality DLO that goes beyond the basic screencast. In this workshop, we will walk participants through the entire lifecycle of the process from creating a lesson plan to assessment and maintenance. Participants should bring their laptops (make sure you can install some suggested software) and a project they're excited to start working on.

Starting with the ACRL Framework we will talk about how to define student learning outcomes (SLOs) in line with the framework and what we want students to accomplish. From their SLOs participants will create a lesson plan that the DLO will fit into. At this time we will also discuss how a single DLO can fit into a larger instructional program, including how to scaffold and reuse objects.

Once participants have their lesson plan we will go over different types of software including free and open source options. We will discuss the uses, pros and cons of different software and how to incorporate technology into different types of lesson plans and basic principles of accessible design. Creating quality components of DLOs will be discussed, covering the introduction, content, practice, feedback and student assessment. Guidelines will be provided for creating media assets such as animation, audio, images, text, and video. After investigating a few software options, participants will have the opportunity to apply what they learned to creating their own DLO, projects will be individual or in small groups.

By the end of the workshop all participants should have at least a rough draft of their learning object. After the objects have been created, we will discuss qualitative or quantitative options for assessment. We will discuss plans for evaluating use and when to check to update the item. Participants will have a chance to share their objects and plans with the group and will be invited to share their contact information with other workshop participants for follow up and networking.

I. ACCOMPLISHMENTS and EVALUATION

The presentation was given as anticipated on March 22, 2017 at the Association of College & Research Libraries (ACRL) conference in Baltimore, MD (see online program:

http://www.ala.org/acrl/sites/ala.org/acrl/files/content/conferences/confsandpreconfs/2017/ACRL2017_A.pdf

II. IS YOUR PROJECT COMPLETED? Yes No

III. FINANCIAL STATEMENT

Funds received were put towards general travel and airfare for this conference. The \$410 presentation grant made this presentation financially manageable since I had recently taken on another role in my library that required more travel. Without the ACRL scholarship I received and the LAUC presentation grant I would have had to pay for the entire conference out of pocket.

Original Budget Request:

Hotel (\$75 + taxes x 5 nights): \$400

Airfare: \$500.00

Funding amount requested: \$600.00...

Librarian will cover amount over what is awarded

Total requested from LAUC: \$600

IV. SHARING YOUR PRODUCT/RESULTS

- Presentation slides are available at:
